WELCOME MESSAGES

Message from the Congress Chair

On behalf of the Instituto Nacional de Enfermedades Neoplásicas (INEN), I have the honor to welcome you to the **5th International Cancer Control Congress held in Lima, Peru, from November 3-6, 2013**, and in which we are proud to receive and share with each of you our knowledge and experience in the management of cancer in the country.

In this context, the Peruvian government has been implementing the "Hope Plan", part of a public policy that seeks to benefit and protect our cancer patients and mainly to the lower-income population nationwide, representing a change paradigm in the way of tackling the problem of cancer from the state with a comprehensive and participatory model.

This is why this congress is a special character for everyone working at the Instituto Nacional de Enfermedades Neoplásicas, and for those who work in the health sector, as we are realizing our desire to bring together the most prestigious and renowned researchers and scientists in the field oncology and with whom we share the satisfaction of enriching

knowledge and whose paths point to the same goal which is to defeat cancer and promote the exchange of expertise and also stimulate cancer research.

Finally, I want to thank all the organizing team of the congress, which has been working hard to develop this scientific event successfully.

Thank you very much,

Dr. Tatiana Vidaurre

Chair, 5th International Cancer Control Congress and Regional Committee

Institutional Head, Instituto Nacional de Enfermedades Neoplásicas (INEN), Perú

Regional Committee

Chair

Dr. Tatiana Vidaurre

Jefa Institucional
Instituto Nacional de Enfermedades Neoplásicas (INEN)
Perú

Members

Prof. Dr. Thais Morella Rebolledo de Abache

National Program Coordinator of Oncology
Venezuelan Health Ministry
Venezuela

Dr. Raúl Hernando Murillo Moreno

Director General
Instituto Nacional de Cancerología
Colombia

Dr. Milton Soría Humerez

Jefe de Laboratorio de Patología
Instituto Nacional de Laboratorios en Salud
Bolivia

Dr. Luiz Antonio Santini

Director General,

WELCOME MESSAGES

Welcome Message from the Chair, International Steering & Scientific Committee of ICC5

Over the past decade, ICC5 has continued to evaluate and evolve its role and relevance. Initially, in 2005, the goal was to raise awareness about “population-based cancer control” and the need for national cancer control plans. As this has become generally accepted knowledge, ICC5 has further evolved to cancer and non-communicable disease plans; the need to move beyond planning to implementation; the requirement for integrated activity across public/population health and clinical medicine; the recognition of differing “contexts” for cancer/NCD control in differing cultural and regional settings; and the necessity for collaboration across disciplines and sectors of practice and between agencies, institutions and nations as a means of learning, teaching, and sharing how best to advance population disease control.

We have focused on detailed evaluation of ICC3 (Cernobbio) and ICC4 (Seoul) and the development of logic models to identify the expected purpose, objectives, outputs and outcomes of ICC5. It has been our goal not just to host an international conference, but rather to have an international conference catalyze and impact the cancer and NCD control plans and practices of host nation, geographic region and global partners.

ICC5 in Lima, Peru, engages 5 key directions through its sessions (plenaries, panels and workshops):

- improving human development (social determinants of health)
- mobilizing a societal response to a societal challenge (cancer and NCD control)
- improving population health
- improving cancer treatment, management and care
- ensuring effective transfer of knowledge into action at a population level

Key outputs include the provision of a neutral forum to facilitate discussion of ideas and exchange of information regarding sustainable regional cancer and integrated NCD response; creating a forum for linking the global cancer and NCD agenda and discuss/exchange ideas on how these global commitments are being realized at national and regional levels; address regional, political and policy level key targets identified in the political resolution (UN Global Action Plan resolution, May 2013); continue with the development of regional broad-based action plans for cancer and integrated NCD control; increase momentum to share progress at United Nations disease control meetings

through 2014–2025; fostering partnerships and collaborations between countries and international agencies to maximize expertise and resources; and to provide opportunity for knowledge sharing, exchange and development as it relates to cancer and NCD control within the host country (Peru), the region (RINC; Latin America) and at a global level.

A number of international cancer agencies are active participants (WHO; PAHO; IAEA-PACT; NCI/US; ACS; INCTR; UICC and IARC). The co-hosts are ICCA and INEN, Peru. The Congress Chair is Dr. Tatiana Vidaurr, Institutional Head INEN, Peru. The meeting is being actively developed, endorsed and supported by the Government of Peru, the Government of Canada (PHAC and CPAC), the Ministry of Health, Peru (MINSA) and RINC (the Association of National Cancer Institutes in South and Central America and the Caribbean).

A key element of the implementability of cancer and NCD control plans is the alignment of support — both “top-down” support (political and professional) and “bottom-up” (advocates, patients, and public). Without this alignment of purpose population-based disease control plans are merely “medical documents”, rather than “blueprints” for societal change and health advancement.

ICC5-5 has the potential to move our conventional medical thinking to a new level of societal conviction to change population health outcomes for the better. I hope you will join me in Lima on November 3–6th, 2013, to be a part of this journey.

Yours sincerely,

Dr. Simon Sutcliffe

Plenary Sessions

Monday, November 4, 2013

- 08:10 Plenary Session 1:**
Improving and Sustaining
Prevention in Cancer Control
- 13:30 Plenary Session 2:**
Mobilizing all of Society for
Effective Cancer Control

Tuesday, November 5, 2013

- 08:30 Plenary Session 3:**
Improving Population Health:
Using Data and Evidence to
Support Policy and Programs
- 13:30 Plenary Session 4:**
Improving Integrated Approaches
to Cancer Treatment and Care

Wednesday, November 6, 2013

- 08:30 Plenary Session 5:**
Integrating Research, Practice
and Policy Priorities to Improve
Cancer Control

Workshops

Limited Workshop Capacity

Workshops have limited seating capacity. To secure a seat in your preferred Workshop, please make sure to arrive early. First come first serve.

On Wednesday, November 6, Workshop 5.5 "NIH Grants Funding" has capacity for 35 people only. It is intended for participants interested in applying for NIH implementation grants. Arrive early to secure a seat if interested in attending this Workshop (first come first serve).

Opening Ceremony

Sunday, November 3, 2013
17:00 – 19:30

Plenary Room (Limatambo 3-4-5)

The 5th International Cancer Control Congress will officially open in the Limatambo Room at the Westin Lima Hotel and Convention Center. The Opening Ceremony will feature an overview on cancer control with keynote speakers sharing local, regional and global efforts in cancer control. The ceremony will include regional entertainment followed by a welcome reception. This evening will give you a chance to network with your colleagues, as well as enjoy your first night in Lima.

**17:00 Opening Remarks
Congress Purpose/Outcomes/
Objective**
Dr. Simon Sutcliffe (Canada)

17:10 Welcome to the Congress
Dr. Tatiana Vidaurre (Peru)

**17:20 Welcome Address

Session 1

Improving and Sustaining Prevention in Cancer Control

Monday, November 4, 2013

08:10 – 10:00 PLENARY SESSION

Plenary Room (Limatambo 3-4-5)

Session Overview

The purpose of this session is to discuss the individual and societal factors that influence cancer and NCD risk. We place these in context of their relative contribution to the burden of disease and the time frame for prevention benefits. This session addresses the questions (a) What are the individual and societal factors that influence cancer and NCD risk? (b) How can we intervene? (c) What are the barriers to implementing interventions? (d) What lessons can we learn from both successful and failed strategies?

Co-Chairs

*Dr. Graham Colditz (USA) and
Dr. Eduardo Cazap (Argentina)*

08:10 – 08:20 Agenda Session Overview:
Dr. Colditz and Dr. Cazap

08:20 – 10:00 Presidential Address and Plenary Presentations:

08:20 – 08:40 *Dr. Graham Colditz (USA)*
Cancer and NCD prevention from a global perspective

08:40 – 09:00 *Dr. Jose Del Carmen Sala (Peru)*
Esperanza: the population cancer control plan in Peru

09:00 – 09:05 Welcome and Introduction of Honorable President Ollanta Humala, Peru

09:05 – 09:20 Honorable President Ollanta Humala, Peru

Perspectives from Peru for International and Regional Collaboration on Cancer Control

09:20 – 09:30 Plenary Q&A

09:30 – 09:55 Panel Discussion
"Linking the cancer and NCD control communities and their plans"

Moderator: *Dr. Fernando Leanes (PAHO/Peru)*

Panel Discussants:

- *Dr. Francisco Tejada (USA)*
- *Dr. Edgar Amorin (Peru)*
- *Dr. Tatiana Vidaurre (Peru)*
- *Dr. Hector Miguel Garavito Farro (Peru)*
- *Dr. Andreas Ullrich (WHO/Switzerland)*

09:55 – 10:00 Panel Q&A

10:00–10:30 NETWORKING BREAK

Exhibit Hall - Posters on display

10:30 – 12:30 CONCURRENT WORKSHOPS

Workshop 1.1: Individual and provider-level interventions to reduce cancer risk

Limatambo 3

Co-Leads: *Dr. Graham Colditz (USA) and
Dr. Javier Manrique (Peru)*

The workshop explores interventions that can be implemented by healthcare professionals to reduce an individual's or population's risk of cancer.

10:30 – 10:40 Workshop Overview & Introduction of Speakers

10:40 – 11:20 Oral Abstract Presentations

10:40 – 10:50 **WS 1.1.1 (pg.9)**
A Professionals Education Program on Cervical Cancer Prevention: Results of an e-Learning Experience
Dr. José M. Borrás (Spain)

10:50 – 11:00 **WS 1.1.2 (pg.9)**
Cancer Prevention Center: a 9 Years Experience of Health Promotion, Cancer Prevention and Early Detection
Dr. Alice M. Zelmanowicz (Brazil)

11:00 – 11:10 **WS 1.1.3 (pg.10)**
Tips and Lessons Learned From an Established Population Health Based Primary Cancer Prevention Program
Sonia Lamont (Canada)

11:10 – 11:20 Oral Presentations Q&A

11:20 – 12:20 Table Discussions

12:20 – 12:30 Reports, Discussions & Conclusions

Workshop 1.2: Community-based interventions to reduce cancer risk

Limatambo 4-5

Co-Leads: *Dr. Neal Palafox (USA) and
Dr. Gustavo Sarria (Peru)*

The workshop explores methods and examples of utilizing the social, cultural, knowledge, and stakeholder assets of a community to ensure that cancer/NCD interventions are effective and sustainable. We will explore the utility and components of working in a community-based participatory framework, working to build community capacity, engaging communities as an equal partner, and making the community an essential component of problem solving.

10:30 – 10:40 Workshop Overview & Introduction of Speakers

10:40 – 11:20 Oral Abstract Presentations

10:40 – 10:50 **WS 1.2.1 (pg.10)**
Training to Trainers in Cancer Prevention Counseling
Dr. Gustavo Sarria Bardales (Peru)

10:50 – 11:00 **WS 1.2.2 (pg.11)**
INCA- Doors Open to High School
Prof. Suse D. Silva-Barbosa (Brazil)

Workshop 1.3: Policy-based interventions for reducing cancer risk

Urabamba-Arequipa

Co-Leads: *Dr. Andreas Ullrich (WHO/Switzerland) and Dr. Roxana Regalado (Peru)*

The workshop explores policy interventions that can be implemented to reduce the risk of cancer in a community and policies around linking the cancer and NCD communities. This workshop will address the following areas of work: Setting national/ community priorities in cancer risk

SCIENTIFIC PROGRAM ■ MONDAY, NOVEMBER 4, 2013

reduction: behavior versus infectious versus environmental causes; roles of government, civil society and the health care system; synergies between cancer and NCD risk reduction: how to link to CVD, pulmonary disease, and diabetes initiatives and achieve win-win situations; how to identify non-behavioral cancer risks (e.g. infections and environmental risks) and liaise with the infection control/vaccine and environmental communities; how to position cancer screening programs in national priority setting and community implementation given that screening programs are unique to cancer in the NCD agenda

10:30 – 10:40 Workshop Overview & Introduction of Speakers

Session 2

Mobilizing all of Society for Effective Cancer Control

Monday, November 4, 2013

08:30 – 10:00 PLENARY SESSION

Plenary Room (Limatambo 3-4-5)

Session Overview

The purpose of this session is to understand and strengthen ways to mobilize an effective all of society response to the growing challenges of cancer/NCD control including how to better impact public policy while informing and engaging all of society. The session examines the issues and challenges, best practices, and opportunities of creating societal movements; defining sector roles and highlighting interventions to improve future interactions and progress.

The session will discuss the role and relationships of patient and community groups (NGOs) with the general public, academia, health professionals, policy-makers, industry, private sector and other stakeholders; how organizational capacity leadership and networks are developed; how various

stakeholder groups engage as a civil society; how effective communication and advocacy takes place, including the role of the media, and how we can make these relationships more effective and reflective of society's roles and responsibilities in enhancing population – based cancer control.

Co-Chairs

Cristina Parsons Perez (USA) and Eva Maria Ruiz de Castilla (Peru)

13:30 – 13:40 Session Overview

13:40 – 14:40 Plenary Panel Discussion
"Creating and Sustaining Cancer Movements: An All of Society Approach to Cancer Control"

Moderator: *Dr. Elmer Huerta (USA)*

& Conclusions

Workshop 2.2: Integration across regions and sectors

Limatambo 4-5

Co-Leads: *Paula Kim (USA) and Mariana Faria
(Brazil)*

This workshop intends to understand how regions currently do or do not promote the exchange of ideas, knowledge and best practices among participants from countries with well-established civil society (United States, Canada, Europe, etc.) with participants from the Latin American/ Caribbean Region and addresses challenges and potential interventions to strengthen future collaborative efforts towards better cancer control.

SCIENTIFIC PROGRAM ■ TUESDAY, NOVEMBER 5, 2013

Session 3

Improving Population Health: Using Data and Evidence to Support Policy and Programs

Tuesday, November 5, 2013

08:30 – 10:00 PLENARY SESSION

Plenary Room (Limatambo 3-4-5)

Session Overview

The purpose of this session is to discuss improving the health of the population through risk factor control and early detection activities with a focus on using data from registries and surveillance. This session addresses the questions (a) What is the available evidence on the most effective screening and early detection interventions? (b) How can low and middle income countries prioritize interventions given limited resources? (c) How can data from registries and surveillance be used to inform and evaluate interventions? (d) How can data be translated into evidence-based practice guidelines that health care providers and community health promoters can use to influence health seeking behavior?

Co-Chairs

Dr. David Forman (IARC/France) and Dr. Carlos L. Santos (Peru)

08:30 – 08:40 Session Overview

08:40 – 09:40 Plenary Presentations:

08:40 – 09:00 *Dr. David Forman (IARC/France)*
Registries, data and measurement

09:00 – 09:20 *Dr. Nathalie Broutet (Switzerland)*
Revised WHO guidelines for a comprehensive approach to cervical cancer prevention

09:20 – 09:40 *Dr. Carlos L. Santos (Peru)*
Building capacities in the control of cancer in women in Peru

09:40 – 10:00 Plenary Q&A

10:00–10:30 NETWORKING BREAK

Exhibit Hall - Posters on display

10:30 – 12:30 CONCURRENT WORKSHOPS

Workshop 3.1: Policies around screening and early detection programs in low and middle income countries

Limatambo 3

Co-Leads: *Dr. Edward Trapido (USA) and Dr. Jose Jeronimo (Peru)*

The evidence about and recommendations for cancer screening have changed substantially in the past five years. New recommendations exist for cancers of the breast, prostate, colon, cervix, and lung cancer. Given the changes in evidence, and the limited resources usually available for screening, countries have to decide what modalities are going to be recommended for population screening, given the limited resources available in low-middle income countries. While the newest technologies are often appealing to have, they are rarely the best way to reach large populations of asymptomatic populations at risk for cancer.

10:30 – 10:40 Workshop Overview & Introduction of Speakers

11:10 – 11:20 Oral Presentations Q&A

11:20 – 12:20 Table Discussions

12:20 – 12:30 Reports, Discussions & Conclusions

Workshop 3.2: Communicating the evidence: Role of the health care provider and community health promoter in informing health seeking behaviour

Limatambo 4-5

Co-Leads: *Dr. August Burns (USA) and Lic. Abel Limache (Peru)*

While data about best practice informs policy, this information is often not passed on to health care workers, community health promoters or those seeking health services in language that they can understand so as to inform practice and health seeking behavior. The workshop explores how to communicate information about best practices and new policies to health care providers working directly with patients and how to translate this information into language that communities will understand.

10:30 – 10:40 Workshop Overview & Introduction of Speakers

10:40 – 11:20 Oral Abstract Presentations

Session 4

Improving Integrated Approaches to Cancer Treatment and Care

Tuesday, November 5, 2013

13:30 – 15:00 PLENARY SESSION

Plenary Room (Limatambo 3-4-5)

Session Overview

The purpose of this session is to address how to highlight integrated approaches to interventional treatment, management and care of the patient based on global and Latin American experiences. This session discusses the questions (a) What is the current status of cancer care and treatment globally and within Latin America specifically? (b) What possible solutions are being suggested? (c) What treatment and care approaches work and why? (d) What treatments could be used? (e) What are the

gaps in cancer treatment and management? (f) How are services organized internationally and/or within the region at present? (g) Which directions can be considered? (h) Are there models that embrace interdisciplinary, public health, medical care and inter-sectoral approaches to disease control?

Co-Chairs

Dr. Rolando Camacho (IAEA/Austria) and Dr. Raul Hernando Murillo Moreno (Colombia)

13:30 – 13:40 Session Overview

13:40 – 14:40 Plenary Presentations:

Workshop 4.2: Building palliative care

Limatambo 4-5

Co-Leads: *Dr. Gaspar Da Costa (Panama)*
and *Dr. Gillian Fyles (Canada)*

This workshop intends to have a hands-on, interactive round table discussion of the 'current state' and 'desired future state' of palliative care in the Latin American region. The intent is to promote exchange of ideas among participants from countries with well-established palliative care services (United States, Canada, Europe, etc.) with participants from the Latin American Region on addressing the challenges being faced in building and/or integrating palliative care into cancer care.

SCIENTIFIC PROGRAM - WEDNESDAY, NOVEMBER 6, 2013

Session 5

Integrating Research, Practice and Policy Priorities To Improve Cancer Control

Wednesday, November 6, 2013

08:30 – 10:00 PLENARY SESSION

Plenary Room (Limatambo 3-4-5)

Session Overview

The purpose of this session is to discuss integration of research, practice and policy priorities to improve cancer control at a population level. This session addresses the questions (a) What are the near term policy opportunity windows to align research, practice, and policy priorities to improve cancer control; (b) How are policy and practice influenced by economic and political realities above and beyond health priorities; (c) How does integration of research, practice and policy influence health disparities; and (d) What are the practical and political priorities for implementing cancer control in Latin American countries.

Co-Chairs

Dr. Cynthia A. Vinson (USA) and
Dr. Luiz Antonio Santini (Brazil)

08:30 – 08:40 Session Overview

08:40 – 09:40 Plenary Presentations:

08:40 – 09:00 *Dr. Jon Kerner (Canada)*
Opportunities for integrating pragmatic research approaches to support practice and policy priorities

09:00 – 09:20 *Eva Maria Ruiz de Castilla Yabar (Peru)*
The political science perspective: How is policy influenced beyond the health perspective?

09:20 – 09:40 *Dr. Henry Gomez Moreno (Peru)*
Integration of methodology of research on improvement of clinical practice

09:40 – 10:00 Plenary Q&A

10:00–10:30 NETWORKING BREAK

Exhibit Hall - Posters on display

10:30 – 12:30 CONCURRENT WORKSHOPS

**For Workshop 5.5, PLEASE NOTE:
Limited seating capacity for 35 people
only (first come first serve)**

Workshop 5.1: Operations research in cancer control

Limatambo 3

Co-Leads: *Dr. Rami Rahal (Canada)*

The workshop explores how quantitative and qualitative approaches can be used for measuring and evaluating the cancer control system, including setting national targets and monitoring progress towards achievement of cancer control objectives.

10:30 – 10:40 Workshop Overview & Introduction of Speakers

10:40 – 11:20 Oral Abstract Presentations

10:40 – 10:50 **WS 5.1.1 (pg.93)**

The Opening Ceremony will include regional entertainment followed by an Welcome Reception. This evening will give you a chance to network with your colleagues, as well as enjoy your first night in Lima.

The Opening Ceremony & Welcome Reception is included in Full Registration.

Gala Dinner

Date: Tuesday, November 4th, 2013
Time: 19:00

Presented by:

FINANCIAL CONTRIBUTORS

We would like to thank our Financial Contributors for supporting the 5th International Cancer Control Congress.

Canadian Partnership Against Cancer

The Canadian Partnership Against Cancer is an independent organization funded by the federal government, through Health Canada, to accelerate action on cancer control for all Canadians. We bring together cancer survivors, patients and families, cancer experts and government representatives to implement the first pan-Canadian cancer control strategy.

International Atomic Energy Association - PACT

PACT represents IAEA's collaborative approach to maximize the impact of its development initiatives in radiation medicine knowledge and technologies through comprehensive cancer control programmes. PACT works within strategic partnerships with WHO

and other key organisations to help mobilize resources for national capacity building to fight cancer effectively in developing countries.

Lance Armstrong Foundation

The Lance Armstrong Foundation provides the practical information and tools people with cancer need to live life on their own terms. We take aim

at the gaps between what is known and what is done to prevent suffering and death due to cancer. We unite people to fight cancer and pursue an agenda focused on:

- Prevention
- Access to screening and care
- Improvement of the quality of life for cancer survivors
- Investment in research

Founded in 1997 by cancer survivor and champion cyclist Lance Armstrong, the LAF is a registered 501(c)(3) nonprofit organization located in Austin, Texas.

National Cancer Institute

The NCI in the United States leads the National Cancer Program and the effort to dramatically reduce the burden of cancer and improve lives of cancer patients and their families, through research into prevention and cancer biology, the development of new interventions, and the training and mentoring of new researchers.

The Public Health Agency of Canada

Public Health Agency of Canada Agence de la santé publique du Canada

The Public Health Agency of Canada, established in 2004, promotes and protects the health of Canadians through leadership, partnership, innovation and action in public health. The ongoing commitment to the promotion of health, the prevention and control of chronic disease and injury, the prevention of infectious diseases, and emergency preparedness is achieved by using the best evidence and tools to provide public health information, advice and leadership to Canadians and stakeholders, and by building and sustaining public health networks. The Public Health Agency of Canada also anticipates, prepares for, responds to and recovers from threats to public health and national public health emergencies.

The World Bank Group and Health, Nutrition and Population

THE WORLD BANK

The World Bank Group is a vital source of financial and technical assistance to developing countries

around the world, with the goals of ending extreme poverty and boosting shared prosperity. Improving health is integral to achieving these goals. The World Bank Group provides financing, state-of-the-art analysis, and policy advice to help countries expand access to quality, affordable health care; protect people from falling into poverty or worsening poverty due to illness; and promote investments in all sectors that form the foundation of healthy societies.
